Pricing Models

The VDC service is available in two commercial models; Utility and Commit. Pricing the service is broken down into constituent Service Resources including vCPU, RAM, storage & software license resources. Pricing network connectivity is easy as in all but the most extreme circumstances the cost of network is zero.

Utility Service

Service Resource has a charge per hour. The customer is charged at the end of the month based on the customers' total use of Service Resources, factoring in quantity and number of hours.

Service Resource	Unit	Price per hour	Price per month
CPU	vCPU	€ 0.01600	€ 11.68
RAM (ESX)	GB	€ 0.01521	€ 11.10
vDisk	GB	€ 0.00025	€ 0.18
EBS Magnetic & SSD	GB	€ 0.00019	€ 0.14
EBS Magnetic & SSD -- Protected	GB	€ 0.00030	€ 0.22
EBS Magnetic -- Mirrored	GB	€ 0.00047	€ 0.34
Object Storage (replicated)	GB	€ 0.000082	€ 0.06

Discounts for Utility Service

Volume discounts are applied to charges based on the total spend for each month, excluding those for 3rd party products such as software licenses, vendor support packages and blended services, based on the following discount bands:

Monthly Utility Spend Band	Min	Max	Discount
	0 EUR	4999 EUR	0%
5000 EUR	9999 EUR	2%	
10000 EUR	14999 EUR	4%	
15000 EUR	50000 EUR	6%	

Committed Service

Committed services provide a lower cost option for predictable use of resources over longer periods, where discounts are applied on the equivalent Utility use for both the term and the volume (spend) of commitment. Committed services offer greater budget predictability but still allow excess Utility use of VDC as demand requires.
